

Outsiders are now imposing how the insiders should do their jobs.

現在，外行人指示內行人該如何行事。

Critical Success Factors

There are various types of financial institutions handling the wealth of the HNWIs (High Net Worth Individuals). In Hong Kong and Singapore, these consist mainly of the banks, securities houses, independent financial advisors (IFAs), asset management and fund companies, family offices and some private equity firms. All these companies are regulated by either MAS (Monetary Authority of Singapore), HKMA (Hong Kong Monetary Authority) or SFC (Securities and Futures Commission) in Hong Kong.

In Asia, the banks still hold the largest amount of AUM of the HNWIs. UBS, for example, had about US\$274 billion of AUM in 2016; followed by Citibank and Credit Suisse (globally, UBS maintains the biggest AUM of about US\$1 trillion). Total AUM of the largest 20 banks amounted to about US\$1.47 trillion in Asia. The other non-bank financial institutions retain inconsequential assets. Asset and fund management companies hold investment funds mainly from banks (invested by HNWIs), domestic and global institutional investors. IFAs and family offices hold other scattered assets.

The critical determinant factors for a successful, profitable and sustainable private banking and wealth management business are the financial institution's ability to attract and maintain the wealth of the HNWIs, at an optimal cost-to-income ratio.

成功的關鍵因素

管理高淨值人士財富的金融機構，有不少種類。在香港和新加坡，主要有銀行、證券公司、獨立財務顧問、資產管理及基金公司、家族辦公室，以及私募股權公司等。這些機構均受新加坡金融管理局、香港金融管理局，或香港證券及期貨事務監察委員會監管。

在亞洲，銀行依然是管理多數高淨值人士資產的機構。以2016年為例，瑞士銀行管理約2,740億美元的資產，緊隨其後的是花旗銀行和瑞士信貸。在全球，瑞士銀行管理的資產總值約為1萬億美元。在亞洲，規模排名首20位的銀行，管理的資產總值約為14,700億美元。其它非銀行金融機構所管理的資產總值相對微不足道。資產和基金管理公司主要管理銀行（由高淨值人士投資）、本地以及國際機構投資者的投資基金。獨立財務顧問及家族辦公室等，則管理其它零星資產。

私人銀行和財富管理業務能否成功、獲利及持續發展的關鍵因素，在於他們能否以最理想的成本收入比例，吸引及保持高淨值人士的財富。
